

# WHITEPAPER

## Piggy Bonki

# Piggy Bonki

- **Abstract**

Piggy Bonki is a light-hearted memecoin with serious community ambitions. Built on the Binance Smart Chain (BSC), it combines the viral appeal of internet culture with transparent on-chain mechanics such as staking and deflationary tokenomics. This document outlines the vision, technology, token economics, roadmap, and governance model for Piggy Bonki.

"Bonk the pig, stack the bags!"

Piggy Bonki originates from the playful imagery of a piggy bank getting a friendly “bonk” — a symbol of saving, rewarding, and occasionally going oink-to-the-moon. While rooted in meme culture, the project strives to build actual utility through staking, community-driven initiatives, and cross-chain payment flexibility.

Coinsult

# 1.1 Problem Statement

Many memecoins lack longevity and meaningful token utility.

Holders often face unreliable reward structures and unclear development roadmaps.

# 1.2 Our Solution

Piggy Bonki introduces:

1. Fair, transparent tokenomics with a hard-capped supply of 100 trillion PIGGY.

2. Native staking that rewards long-term holders.

3. Multi-currency on-ramp: buy with BNB, ETH, USDT, or USDC.

4. Community-first governance backed by a lighthearted brand.

**Vision: Become the most community-beloved memecoin on BSC, where fun meets finance.**

**Mission: Provide an engaging ecosystem that rewards participation, educates newcomers, and delivers consistent value through staking and novel utility features.**

Total Supply: **100,000,000,000,000**

Token Address: [0xcdA47043B5E4D9819B842E14020061c4AD0135f9](#)

# Staking Rewards

Piggy Bonki staking pools will allow holders to lock PIGGY tokens to earn additional PIGGY — encouraging loyalty and reducing circulating supply.

Pool Lock Period APR

Piglet 30 days 90% APY

Hog 90 days 180% APY

Grand Boar 365 days 500% APY

Rewards are funded from the designated Staking Rewards Pool plus a share of transaction taxes.

# HOW TO BUY

Follow these simple steps to participate in the PIGGY BONKI presale

## Connect Wallet

Connect your MetaMask or other Web3 wallet to get started. Make sure you have enough BNB/ETH for the purchase and gas fees.

## Choose Payment Method

Select your preferred payment method: BNB, ETH, USDT, or USDC. We support both BSC and ETH networks for maximum flexibility.
